

BENIHIRWE Flavienne

I am a results-driven professional with hands-on experience in operations coordination, process improvement, and cross-functional collaboration. I am currently pursuing a degree in Software Engineering. My technical foundation in programming, systems thinking, and data management strengthens my ability to analyze workflows, optimize processes, and support data-driven decision-making. I bring structure, efficiency, and disciplined problem-solving to operational environments, ensuring smooth execution and alignment with organizational goals. By combining operational experience with technical insight, I contribute to building scalable systems that enhance performance and long-term growth.

EDUCATION

AFRICAN LEADERSHIP UNIVERSITY, Rwanda —
Software Engineering program (2024 - 2027)

ALX AFRICA, Rwanda — **AI Essentials**
January 2024 - July 2024

ECOLE TECHNIQUE SAINT KIZITO SAVE, Rwanda
— **High School Diploma in Software Development**
January 2020 - August 2023

SKILLS

UI/UX Design(UI design principles, UX fundamentals, Prototyping, Figma)

Front-end Development (HTML, CSS, JavaScript, Angular, Node.js, Responsive web design)

Back-end Development (Basic Python, DSA fundamentals, basic understanding of web architecture, HTTP/HTTPS fundamentals)

Tools & Other technical skills (Git & GitHub, VS Code, Microsoft office tools and Google tools)

Soft skills (Problem solving, Communication skills, Teamwork & Collaboration, Time management, Attention to details, Adaptability and willingness to learn)

EXPERIENCE

Rwanda Information Society Authority (RISA) — Academic Internship
Jan 2026 – March 2026

- Designed UI mockups and templates to guide government institutions in building digital platforms
- Translated UI designs into functional front-end code
- Created Responsive layouts for different screen sizes(desktop, tablet, mobile)

NATCOM, Kigali - Front-end, Back-end Developer Intern
March 2023 - May 2023

- It emphasized innovation and the opportunity to dive deeper into complex technical challenges.
- Provided me with a deeper understanding of both front-end and back-end development, preparing me more effectively for future roles in the field.

NOVA, Kigali - Front-end Developer Intern
March 2022 - April 2022

- I had the invaluable opportunity to delve into both front-end and back-end designs. Working closely with a dedicated team, I acquired practical skills in developing user interfaces and implementing robust back-end systems.
- Diving into backend development honed my problem-solving skills as I tackled complexities in data management, security, and system optimization.

LANGUAGE(S)

English - Fluent
French - Conversational

AWARDS

Certificate — ALX AFRICA, Rwanda — AI Essentials

Internship Certificate — Natcom

Certificate — The GYM: Code in Gap Year

EXTRA-CURRICULAR

The Gym - Preparatory Coding Training: Code in Gap Year

- Completed foundational coding training to strengthen programming skills and prepare for a formal Software Engineering program.
- Engaged in hands-on exercises to build problem-solving, logic, and coding fundamentals.

SheCodes Africa - Coding Foundations Training

- Completed introductory coding training to build foundational skills in web development, HTML, CSS, and JavaScript before starting a formal Software Engineering program.
- Developed practical exercises and mini-projects, demonstrating initiative and preparation for a structured software engineering curriculum.
